WEEKLY WATER DASHBOARD

26 October 2026

Headline Statistics

WCWSS DAM STORAGE (%)	WEEKLY DAM LEVEL CHANGE (%)	AVERAGE TOTAL DAILY WATER USE (MLD)*	AVERAGE WATER USE PER PERSON (l/d)**
73.7	-0.30	864	148

* The total daily water usage is the total water provided by the City of Cape Town and includes water provided to Stellenbosch and Drakenstein Municipalities
** The average per person water use is the average for the City of Cape Town only and is estimated as Total Water Use / Population. Summer demands are expected to be higher than the yearly average due to the increased use of water for outdoor irrigation. Average water use per person over the last 12 months was approximately 160 l/d

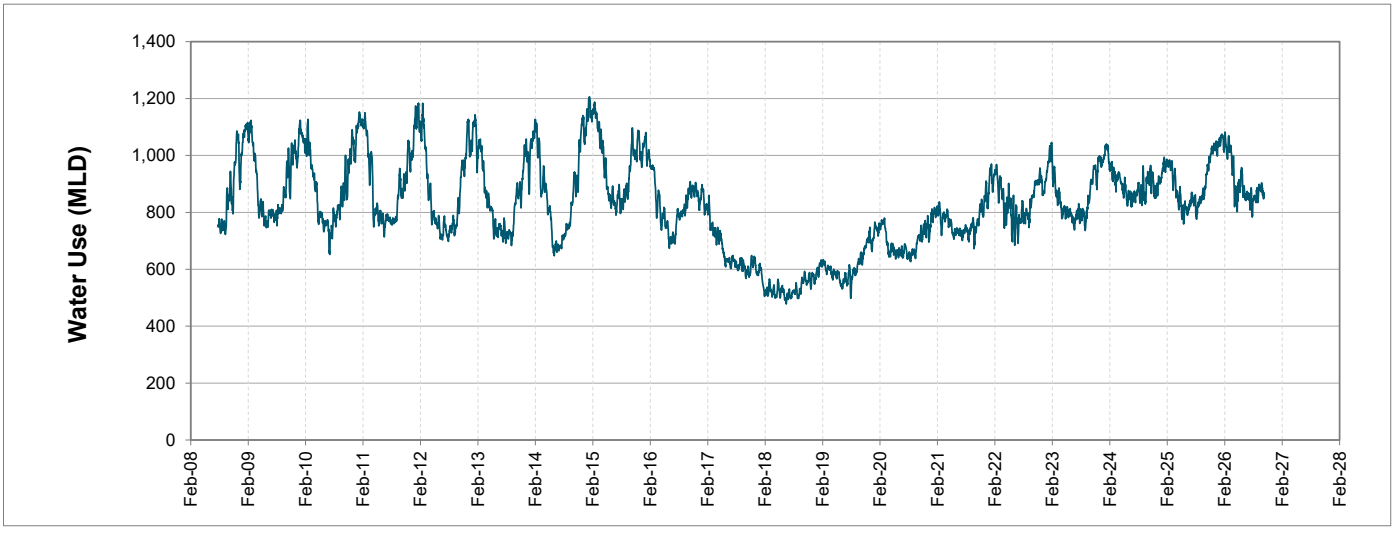

Water Resource Status

WATER RESOURCE STATUS	MEANING OF CURRENT STATUS
Drought Response	Rainfall since May 2026 has been below expected levels, resulting in dam storage levels remaining approximately 15% lower than at the same time last year. Current forecasts do not indicate any significant rainfall in the near future. The City is focusing on maximising yield from the Western Cape Water Supply System (WCWSS), prioritising infrastructure repairs, and implementing additional water conservation and demand management measures. The City continues to engage with relevant stakeholders on the possible need for formal water restrictions. Given the current dam levels, it is important for residents and businesses to remain water-wise and use water responsibly to help sustain supply should the dry conditions persist.

Water Production from Different Sources

MAJOR DAMS (MLD)	MINOR DAMS (MLD)	GROUND WATER AND SPRINGS (MLD)
850	2	12

Overal Water Usage Trend (2010 - Present)

WCWSS means Western Cape Water Supply System
MLD means million litres per day
More information on Water Saving and Restrictions is available on the City of Cape Town's 'ThinkWater' website

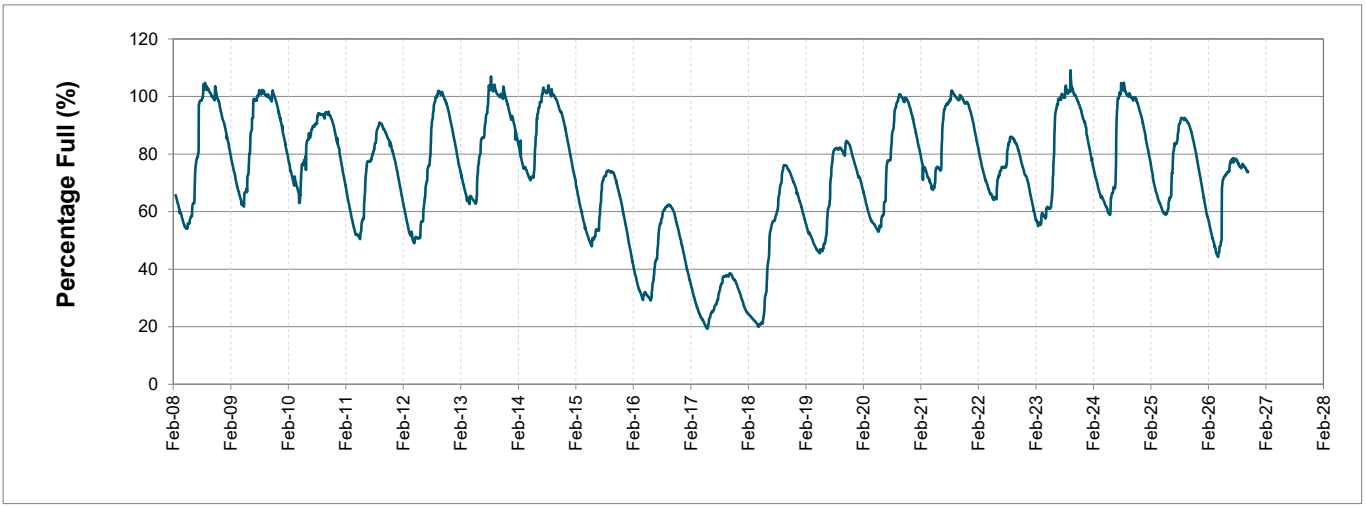

Water Stored in Major Dams (WCWSS)

This table shows CCT drinking water quality compliance according to the South African National Standard 241:2015. Compliance, measured against all prescribed chemical and microbiological components, consistently exceeds the very high CCT target of 99%. (Overall compliance percentages of continuous sampling and analysis are released on a monthly basis.
